

CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS

For the three and six months ended June 30, 2015 and 2014

Belo Sun Mining Corp.

NOTICE OF NO AUDITOR REVIEW OF CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS

Under National Instrument 51-102, Part 4, subsection 4.3(3) (a), if an auditor has not performed a review of the condensed interim consolidated financial statements, they must be accompanied by a notice indicating that the interim financial statements have not been reviewed by an auditor.

The accompanying unaudited condensed interim consolidated financial statements of the Company have been prepared by and are the responsibility of the Company's management.

The Company's independent auditor has not performed a review of these condensed interim consolidated financial statements in accordance with standards established by the Canadian Institute of Chartered Accountants for a review of interim financial statements by an entity's auditor.

(Expressed in Canadian dollars unless otherwise noted)

1. Nature of operations and going concern

Belo Sun Mining Corp. ("Belo Sun" or the "Company"), through its subsidiaries (Note 14), is a gold exploration company engaged in the exploration of properties located in Brazil. The Company is a publicly listed company incorporated in the Province of Ontario. The Company's shares are listed on the Toronto Stock Exchange. The Company's head office is located at 65 Queen Street West, 8th Floor, Toronto, Ontario, Canada, M5H 2M5.

Although the Company has taken steps to verify title to the properties on which it is conducting exploration and in which it has an interest, in accordance with industry standards for the current stage of exploration of such properties, these procedures do not guarantee the Company's title. Property title may be subject to unregistered prior agreements, unregistered claims, aboriginal claims and non-compliance with regulatory and environmental requirements.

The business of mining and exploring for minerals involves a high degree of risk and there can be no assurance that current exploration programs will result in profitable mining operations. The Company's continued existence is dependent upon the preservation of its interests in the underlying properties, the discovery of economically recoverable reserves, the achievement of profitable operations, or the ability of the Company to raise additional financing, if necessary, or alternatively upon the Company's ability to dispose of its interests on an advantageous basis. Changes in future conditions could require material write-downs of the carrying values. The Company's mining assets that are located outside of North America are subject to the risk of foreign investment, including increases in taxes and royalties, renegotiation of contracts, expropriation and currency exchange fluctuations and restrictions.

These consolidated financial statements have been prepared on the basis of accounting principles applicable to a going concern, which assume that the Company will be able to continue in operation for the foreseeable future, will be able to realize its assets, and discharge its liabilities and commitments in the normal course of business. Because of continuing losses, the Company's continuance as a going concern is dependent upon its ability to obtain adequate financing and to reach a profitable level of operations. It is not possible to predict whether financing efforts will be successful or if the Company will attain a profitable level of operations. Management believes it will be successful in raising the necessary funding to continue operation in the normal course of operations, however there is no assurance that these funds will continue to be available on acceptable terms to the Company or at all and may raise significant doubt as to the Company's ability to continue to operate as a going concern. These consolidated financial statements do not reflect any adjustments to the carrying values and classification of assets, or the amounts of, and classification of liabilities that would be necessary if the going concern assumption was not appropriate. Such adjustments could be material.

(Expressed in Canadian dollars unless otherwise noted)

2. Significant accounting policies

a) Statement of compliance

These condensed interim consolidated financial statements of the Company and its subsidiaries have been prepared in accordance with International Accounting Standards ("IAS") 34, Interim Financial Reporting, as issued by the International Accounting Standards Board ("IASB"). The policies applied in these condensed interim consolidated financial statements are based on International Financial Reporting Standards ("IFRS") issued and outstanding as at June 30, 2015. The policies as set out in the Company's Annual Consolidated Financial Statements for the twelve months ended December 31, 2014 were consistently applied to all the periods presented unless otherwise noted below. The Board of Directors approved these condensed interim consolidated financial statements for issue on August 13, 2015.

b) Basis of preparation

These condensed interim consolidated financial statements were prepared on a going concern basis, under the historical cost convention, as modified by the revaluation of financial assets and financial liabilities (including derivative instruments) at fair value through profit or loss.

The preparation of financial statements requires the use of certain critical accounting estimates. It also requires management to exercise judgment in applying the Company's accounting policies.

c) New and future accounting policies

Certain pronouncements were issued by the IASB or the IFRIC that are mandatory for accounting periods on or after January 1, 2015 or later periods. Many are not applicable or do not have a significant impact to the Company and have been excluded.

IFRS 8 - Operating Segments ("IFRS 8") was amended to require an entity to disclose the judgments made by management in aggregating segments. IFRS 8 was also amended to clarify that an entity needs to present a reconciliation between the total reporting segment's assets to the entities' total assets if this information is usually provided to the chief operating decision maker. The amendments are effective for annual periods beginning on or after July 1, 2014. At January 1, 2015, the Company has adopted this pronouncement and has made the required disclosure.

IAS 24 – Related Party Disclosures ("IAS 24") was amended to clarify that an entity providing key management services to the reporting entity or the parent of the reporting entity is a related party of the reporting entity. The amendments also require an entity to disclose amounts incurred for key management personnel services provided by a separate management entity. The amendments to IAS 24 are effective for annual periods beginning on or after July 1, 2014. At January 1, 2015, the Company has adopted this pronouncement and there was no material impact on the Company's financial statements.

(Expressed in Canadian dollars unless otherwise noted)

IFRS 9 – Financial Instruments ("IFRS 9") was issued by the IASB in November 2009 with additions in October 2010 and May 2013 and will replace IAS 39 Financial Instruments: Recognition and Measurement ("IAS 39"). IFRS 9 uses a single approach to determine whether a financial asset is measured at amortized cost or fair value, replacing the multiple rules in IAS 39. The approach in IFRS 9 is based on how an entity manages its financial instruments in the context of its business model and the contractual cash flow characteristics of the financial assets. Most of the requirements in IAS 39 for classification and measurement of financial liabilities were carried forward unchanged to IFRS 9, except that an entity choosing to measure a financial liability at fair value will present the portion of any change in its fair value due to changes in the entity's own credit risk in other comprehensive income, rather than within profit or loss. The new standard also requires a single impairment method to be used, replacing the multiple impairment methods in IAS 39. IFRS 9 is effective for annual periods beginning on or after January 1, 2018. Earlier adoption is permitted. The Company has not yet considered the potential impact of the adoption of IFRS 9

IAS 1 – Presentation of Financial Statements ("IAS 1") was amended in December 2014 in order to clarify, among other things, that information should not be obscured by aggregating or by providing immaterial information, that materiality consideration apply to all parts of the financial statements and that even when a standard requires a specific disclosure, materiality considerations do apply. The amendments are effective for annual periods beginning on or after January 1, 2016. Earlier adoption permitted.

IAS 16 - Property, Plant and Equipment and IAS 38 - Intangible Assets are applied retrospectively and clarify in IAS 16 and IAS 38 that the asset may be revalued by reference to observable data on either the gross or the net carrying amount. In addition, the accumulated depreciation or amortization is the difference between the gross and carrying amounts of the asset. This policy will become effective for annual periods starting after, or on January 1, 2016. Earlier adoption permitted.

d) Principles of consolidation

(i) Subsidiaries

All entities in which the Company has a controlling interest are fully consolidated from the date that control commences until the date that control ceases. Control exists when the Company is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee.

(ii) Transactions eliminated on consolidation

Intercompany balances and any unrealized gains and losses or income and expenses arising from intercompany transactions are eliminated in preparing the consolidated financial statements.

(Expressed in Canadian dollars unless otherwise noted)

e) Significant accounting judgments, estimates and assumptions

The preparation of these condensed interim consolidated financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and reported amounts of expenses during the reporting period. These condensed interim consolidated financial statements include estimates, which, by their nature, are uncertain. The impacts of such estimates are pervasive throughout the condensed interim consolidated financial statements, and may require accounting adjustments based on future occurrences. Revisions to accounting estimates are recognized in the period in which the estimate is revised, on a prospective basis. The revision may affect current or both current and future periods.

Information about critical judgments and estimates in applying accounting policies, and areas where assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment within the next financial year are included in the following areas:

Asset carrying values and impairment charges

In the determination of carrying values and impairment charges, management looks at the recoverable amount considered to be higher of value in use or fair value less costs of disposal in the case of assets and at objective evidence, significant or prolonged decline of fair value on financial assets indicating impairment. These determinations and their individual assumptions require that management make a decision based on the best available information at each reporting period.

Recognition of deferred tax assets

In assessing the probability of realizing income tax assets recognized, management makes estimates related to expectations of future taxable income, applicable tax planning opportunities, expected timing of reversals of existing temporary differences and the likelihood that tax positions taken will be sustained upon examination by applicable tax authorities. In making its assessments, management gives additional weight to positive and negative evidence that can be objectively verified. Estimates of future taxable income are based on forecasted cash flows from operations and the application of existing tax laws in each jurisdiction. The Company reassesses unrecognized income tax assets at each reporting period.

Share-based payments

Management determines costs for share-based payments using market-based valuation techniques. The fair value of the market-based and performance-based share awards are determined at the date of grant using generally accepted valuation techniques. Assumptions are made and judgment used in applying valuation techniques. These assumptions and judgments include estimating the future volatility of the stock price, expected dividend yield, future employee turnover rates and future employee stock option exercise behaviours and corporate performance. Such judgments and assumptions are inherently uncertain. Changes in these assumptions affect the fair value estimates.

Assessment of the project stage for mineral properties and activities

In determining whether the Company is in the exploration and evaluation stage or the development stage, management must make an assessment as to whether the technical feasibility and commercial viability of extracting the mineral resource are demonstrable. Management relies on technical studies performed by consultants to make this assessment.

(Expressed in Canadian dollars unless otherwise noted)

• Estimation of close down and restoration costs and the timing of expenditures

The cost estimates are updated annually during the life of a mine to reflect known developments, (e.g. revisions to cost estimates and to the estimated lives of operations), and are subject to review at regular intervals. Decommissioning, restoration and similar liabilities are estimated based on the Company's interpretation of current regulatory requirements, constructive obligations and are measured at fair value. Fair value is determined based on the net present value of estimated future cash expenditures for the settlement of decommissioning, restoration or similar liabilities that may occur upon decommissioning of the mine. Such estimates are subject to change based on changes in laws and regulations and negotiations with regulatory authorities.

• Estimation of asset lives and depletion, depreciation and amortization

Depreciation and depletion expenses are allocated based on assumed asset lives and depletion/depreciation rates. Should the asset life or depletion/depreciation rate differ from the initial estimate, an adjustment would be made in the statement of comprehensive loss.

Determination of functional currency

Under IFRS, each entity within the Company has its results measured using the currency of the primary economic environment in which the entity operates (the "functional" currency). Judgment is necessary in assessing each entity's functional currency. The Company considers the currency of expenses and outflows, as well as financing activities as part of its decision-making process.

Contingencies

Refer to Note 15.

f) Presentation and functional currency

The Company's condensed interim consolidated financial statements are presented in Canadian dollars. The Company's functional and presentation currency is the Canadian dollar. The Company's subsidiaries' functional currency is the United States dollar.

3. Prepaid expenses and sundry receivables

	June 30, 2015	De	cember 31, 2014
Trade receivables and other advances	\$ 19,095	\$	7,733
Reimbursable court fees pending appeal	79,514		-
HST receivable	254,370		183,646
Prepaid insurance	30,440		26,145
	\$ 383,419	\$	217,524

The Company has paid approximately R\$198,000 (\$79,514) in fees with respect to appeal proceedings for which the Company expects to be reimbursed upon successful judgment.

4. Exploration and evaluation expenses and engineering studies

Exploration and evaluation expenditures and engineering studies expensed immediately in the consolidated statement of comprehensive loss for the three and six months ended June 30, 2015 collectively amounted to \$862,633 and \$2,240,362 respectively (three and six months ending June 30, 2014 - \$2,625,502 and \$4,808,722).

(Expressed in Canadian dollars unless otherwise noted)

5. Term investment

The investment consists of a term deposit with Banco do Brasil SA to fund the potential amounts owing to Companhia de Pesquisa de Recursos Minerais ("CPRM"). As at June 30, 2015, the balance in this account was R\$1,287,360 (\$515,974) (December 31, 2014: R\$1,253,690 (\$547,236)) and the Company earned 4.02% in interest for the six months ended June 30, 2015 (June 30, 2014: 4.90%). The Company intends to renew the term deposit on maturity because it is security against the potential amount owing to the CPRM, a Brazilian state owned company to which the Company is committed to paying royalties if a mineable deposit is defined on the Volta Grande Property.

6. Property and equipment

		Furniture &	Mining		
Cost	Vehicles	equipment	equipment	Land	Total

FX adjustment	31,207	21,127	32,993	-	85,327
Balance at June 30, 2015	\$426,804	\$ 330,569	\$ 508,993	\$ -	\$1,266,366
Net book value as at December 31, 2014	\$188,979	\$1,333,681	\$ 191,994	\$5,216,945	\$6,931,599
Net book value as at June 30, 2015	\$151,252	\$1,355,596	\$ 176,735	\$5,663,153	\$7,346,736

During the six months ended June 30, 2015, the Company sold some computer and office equipment and a vehicle for gross proceeds of R\$80,000 (\$34,331). The computer and office equipment sale resulted from the Company's move of its site office from Belo Horizonte to Altamira. This sale was made to Falcon Metais Ltda. (Note 14). As a result of these disposals, a gain on disposal of assets of \$12,497 and \$13,569 was recorded for the three and six months ended June 30, 2015 respectively (three and six months ended June 30, 2014: \$nil and \$nil).

(Expressed in Canadian dollars unless otherwise noted)

Audit and other accruals	56,650		110,650
	\$ 3,344,077	\$	3,667,455

8. Share Capital

As at June 30, 2015 and December 31, 2014, the Company's authorized number of common shares was unlimited without par value and an unlimited number of special shares. The special shares have the same features as the common shares with the exception that the special shares take preference over the common shares in the event of liquidation, dissolution or winding up of the Company. The special shares are entitled to the same dividend rights as common shares.

In May 2015, the Company completed a private placement financing issuing a 62,500,000 common shares of the Company at a price of \$0.24 per share for gross proceeds of \$15,000,000. The Company incurred costs related to this issue of \$30,050 for filing fees.

9. Share-based payments reserves

The Company has an ownership-based compensation plan for executives and employees. In accordance with the terms of the plan, officers, directors and consultants of the Company may be granted options to purchase common shares at exercise prices determined at the time of grant. The Company has adopted a Floating Stock Option Plan (the "Plan"), whereby the number of common shares reserved for issuance under the Plan is equivalent of up to 10% of the issued and outstanding shares of the Company from time to time. The option vesting terms are determined at the discretion of the Board of Directors.

Each employee share option converts into one common share of the Company on exercise. No amounts are paid or payable by the recipient on receipt of the option. The options carry neither rights to dividends nor voting rights. Options may be exercised at any time from the date of vesting to the date of their expiry.

	Number of	Weighted average	Value of
	Options	exercise prices	options
December 31, 2013	22,943,000	\$0.93	\$ 15,141,493
Granted	6,758,000	\$0.12	540,640
Expired/cancelled	(6,523,000)	\$1.19	(5,347,020)
December 31, 2014	23,178,000	\$0.62	\$ 10,335,113
Granted	11,520,000	(\$0.15)	1,728,000
Exercised	(80,000)	(\$0.08)	(6,400)
Expired/cancelled	(4,816,000)	(\$0.38)	(1,834,158)
June 30, 2015	29,802,000	\$0.50	\$ 10,222,555

(Expressed in Canadian dollars unless otherwise noted)

The following share-based payments arrangements were in existence as at June 30, 2015:

Options:

Number	Number			E	Exercise	Expected	Expected	Expected	Risk-free
outstanding	exercisable	Grant date	Expiry date		price	volatility	life (yrs)	dividend yield	interest rate

1,200,000	1,200,000	8-Jun-15	8-Jun-20	\$	0.22	85%	5	0%	1.02%
29,802,000	29,802,000								

Fair value of share options granted in the period:

During the three and six months ended June 30, 2015, 1,200,000 and 11,520,000 options were granted to directors, officers, employees and consultants of the Company. These options vested immediately on grant. As a result, stock-based compensation expense of \$180,000 and \$1,728,000 was recorded for the three and six months ended June 30, 2015 respectively (three and six months June 30, 2014: \$nil and \$nil). The weighted average grant date fair value of the stock options granted during the current period is \$0.15 (June 30, 2014: \$nil). Options were priced using the Black-Scholes option-pricing model. Expected volatility is based on the historical share price volatility over the past 5 years. The expected life of the option was calculated based on the history of option exercises. The weighted average life of the outstanding options at June 30, 2015 is 3.49 years (June 30, 2014: 2.34 years). The weighted average market price on the date of grant for options granted during the period was \$0.22 (June 30, 2014: \$nil).

(Expressed in Canadian dollars unless otherwise noted)

10. Operating segments

Geographical information

The Company operates in Canada where its head off is located and in Brazil where its exploration property is located. Information about the Company's assets by geographical location is detailed below.

	0			Property	Oth	ner long-term	-	
	Cu	rrent assets	an	d equipment		assets	ı	otal Assets
June 30, 2015								
Canada	\$	14,211,288	\$	557	\$	-	\$	14,211,845
Brazil		599,258		7,346,179		515,974		8,461,411
	\$	14,810,546	\$	7,346,736	\$	515,974	\$	22,673,256

11. Loss per share

Basic loss per share is calculated by dividing the loss available to common shareholders by the weighted average number of common shares outstanding in the period. Diluted loss per share reflects the potential dilution of common share equivalents, such as outstanding share options, warrants and contracts to be settled in shares, in the weighted average number of common shares outstanding during the period. In the Company's case, diluted loss per share is the same as basic loss per share as the effects of including all outstanding options, warrants and contracts to be settled in shares would be anti-dilutive.

12. Financial instruments

Financial assets and financial liabilities as at June 30, 2015 were classified as follows:

				A:	ssets /(liabilities)	
	Loans and			at	fair value through	
June 30, 2015	receivables		Other liabilities		profit/loss	Total
Cash and cash equivalents	\$	-	\$ -	\$	14,427,127	\$ 14,427,127
Term investment		-	-		515,974	515,974
Accounts payable and accrued liabilities		-	3,344,077		-	3,344,077

The fair value of accounts payable and accrued liabilities approximates fair value due to the short term nature of the financial instruments.

(Expressed in Canadian dollars unless otherwise noted)

A fair value hierarchy prioritizes the methods and assumptions used to develop fair value measurements for those financial assets where fair value is recognized on the statement of financial position. These have been prioritized into three levels.

Level 1 – Quoted prices (unadjusted) in active markets for identical assets or liabilities

Level 2 – Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly

Level 3 – Inputs for the asset or liability that are not based on observable market data.

Fair value amounts represent point-in-time estimates and may not reflect fair value in the future. The measurements are subjective in nature, involve uncertainties and are a matter of significant judgement.

At June 30, 2015, financial instruments that are carried at fair value, consisting of cash and cash equivalents and term investment have been classified as Level 1 within the fair value hierarchy.

The Company's risk exposures and their impacts on the Company's financial instruments are summarized below. There have been no significant changes in the risks, objectives, policies and procedures for managing risk during the six months ended June 30, 2015.

Credit risk

Credit risk arises from the non-performance by counterparties of contractual financial obligations. The Company's primary counterparty related to its cash and cash equivalents and term investment carry an investment grade rating as assessed by external rating agencies. The Company maintains all of its cash and cash equivalents and term investment with major Canadian, British, US and Brazilian financial institutions. Deposits held with these institutions may exceed the amount of insurance provided on such deposits.

The Company's maximum exposure to credit risk at the balance sheet date is the carrying value of cash and cash equivalents, term investment and sundry receivables.

Liquidity risk

The Company manages liquidity risk by maintaining adequate cash and cash equivalent balances. The Company continuously monitors and reviews both actual and forecasted cash flows, and also matches the maturity profile of financial assets and liabilities.

As at June 30, 2015, the Company had current assets of \$14,810,546 to settle current liabilities of \$3,344,077. Approximately \$3,080,000 of the Company's financial liabilities as at June 30, 2015 have contractual maturities of less than 30 days and are subject to normal trade terms.

Market risk

(a) Interest rate risk

The Company's cash equivalents are subject to interest rate cash flow risk as they carry variable rates of interest. The Company's interest rate risk management policy is to purchase highly liquid investments with a term to maturity of one year or less on the date of purchase.

(Expressed in Canadian dollars unless otherwise noted)

Based on cash and cash equivalent balances on hand at June 30, 2015, a 0.1% change in interest rates could result in a corresponding change in net loss of approximately \$14,400 (December 31, 2014 - \$5,400).

(b) Currency risk

As the Company operates on an international basis, foreign exchange risk exposures arise from transactions and balances denominated in foreign currencies. The Company's foreign currency risk arises primarily with respect to the United States dollar and Brazilian Reais. Fluctuations in the exchange rates between these currencies and the Canadian dollar could have a material effect on the Company's business, financial condition and results of operations. The Company does not engage in any hedging activity to mitigate this risk.

A strengthening of \$0.01 in the United States dollar against the Brazilian Reais would have decreased net income by approximately \$45,000 for the six months ended June 30, 2015 (June 30, 2014 - \$52,000). A strengthening of \$0.01 in the Canadian dollar against the United States dollar would have decreased other comprehensive income by approximately \$14,000 for the six months ended June 30, 2015 (June 30, 2014 - \$24,000). At June 30, 2015, one Canadian dollar was equal to 0.8006 United States dollars (June 30, 2014 – 0.9372) and one Canadian dollar was equal to 2.4950 Brazilian Reais (June 30, 2014 – 2.0640).

13. Capital management

The Company manages and adjusts its capital structure based on available funds in order to support the acquisition, exploration and development of mineral properties. The capital of the Company consists of share capital and share-based payments reserve. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business.

The properties in which the Company currently has an interest are in the exploration and evaluation stage; consequently the Company is dependent on external financing to fund its activities. In order to carry out planned exploration and evaluation, and pay for administrative costs, the Company will spend its existing working capital and try to raise additional amounts as needed. The Company will continue to assess new properties and seek to acquire an interest in additional properties if it feels there is sufficient geologic or economic potential and if it has adequate financial resources to do so. Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable.

There were no significant changes in the Company's approach to capital management during the six months ended June 30, 2015. The Company is not subject to externally imposed capital requirements.

(Expressed in Canadian dollars unless otherwise noted)

14. Related party disclosures

The condensed interim consolidated financial statements include the financial statements of the Company and the subsidiaries at their respective ownership listed in the following table.

	Country of incorporation	% equity interest
Belo Sun Mining (Barbados) Corp.	Barbados	100
Belo Sun Mineracao Ltda	Brazil	100
Intergemas Mineracao e		
Industrailizacao Ltda	Brazil	100
Aubras Mineracao Ltda	Brazil	98
Oca Mineracao Ltda	Brazil	100

During the three and six months ended June 30, 2015, the Company entered into the following transactions in the ordinary course of business with related parties that are not subsidiaries of the Company.

		Purchases of goods/services						
		Three months ended June 30,			Six months ended June 30,			
		2015 2014		2014	2015		2014	
2227929 Ontario Inc.	\$	90,000	\$	67,837	\$	180,000	\$	160,748
Forbes & Manhattan, Inc.		275,000		75,000		350,000		150,000
Falcon Metais Ltda.		43,688		43,356		73,676		84,588

The Company shares office space with other companies who may have common officers and directors. The costs associated with the use of this space, including the provision of office equipment and supplies, are administered by 2227929 Ontario Inc. to whom the Company pays a fee. 2227929 Ontario Inc. does not have any officers or directors in common with the Company.

Mr. Stan Bharti, a director of the Company, is the Executive Chairman of Forbes & Manhattan, Inc., a corporation that provides administrative and consulting services to the Company, including but not limited to strategic planning and business development. Forbes & Manhattan, Inc. charges a monthly consulting fee of \$25,000.

Mr. Helio Diniz, a former director of the Company, is an officer of Falcon Metais Ltda., a company providing exploration and administration services to the Company in Brazil, including bookkeeping and secretarial services. In addition to the above referenced transactions, the Company sold various computer and office equipment to Falcon Metais Ltda. during the six months ended June 30, 2015 for proceeds of R\$50,000 (\$21,790).

The following balances were outstanding at the end of the reporting period:

	Amounts owe		Amounts owed to related parties			
	30-Jun-15	31-Dec-14	30-Jun-15	31-Dec-14		
Falcon Metais Ltda.	-	-	69,193	44,293		
Directors of the Company	-	-	60,050	233,393		

(Expressed in Canadian dollars unless otherwise noted)

The amounts outstanding are unsecured and will be settled in cash. No guarantees have been given or received. No expense has been recognized in the current or prior periods for bad or doubtful debts in respect of the amounts owed by related parties.

Compensation of key management personnel of the Company

The remuneration of directors and other members of key management personnel during the period were as follows:

	Three months ended June 30,			Six months ended				
					June 30,			
	2015		2014		2015		2014	
Short-term benefits	\$1,506,250	\$	408,000	\$	1,934,250	\$	820,000	
Share-based payments	264,000		-		1,641,000		-	

In accordance with IAS 24 Related Party Disclosures, key management personnel are those persons having authority and responsibility for planning, directing and controlling the activities of the Company, directly or indirectly, including any directors (executive and non-executive) of the Company.

15. Commitments and contingencies

- (a) Under a successfully renegotiated agreement with CPRM in March 2008, the Company maintains an interest bearing term deposit to cover the future royalty payments, starting June 30, 2008. As at June 30, 2015, no royalty payments have been paid.
- (b) The Company is party to certain management contracts. These contracts require that additional payments of up to \$6,800,000 be made upon the occurrence of certain events such as a change of control. As the likelihood of these events taking place is uncertain and it is not probable that there will be any outflow of resources to settle the commitment, the contingent payments have not been reflected in these condensed interim consolidated financial statements. Minimum commitments remaining under these contracts were approximately \$769,000 all due within one year.
- (c) The Company is, from time to time, involved in various claims and legal proceedings. The Company cannot reasonably predict the likelihood or outcome of these activities. The Company does not believe that adverse decisions in any pending or threatened proceedings related to any matter, or any amount which may be required to be paid by reasons thereof, will have a material effect on the financial condition or future results of operations. As at June 30, 2015, no amounts have been accrued related to such matters.
- (d) The Company's mining and exploration activities are subject to various federal, provincial and international laws and regulations governing the protection of the environment. These laws and regulations are continually changing and generally becoming more restrictive. The Company conducts its operations so as to protect public health and the environment and believes its operations are materially in compliance with all applicable laws and regulations. The Company has made, and expects to make in the future, expenditures to comply with such laws and regulations.

(Expressed in Canadian dollars unless otherwise noted)

16. Subsequent events

Subsequent to the end of the quarter, 1,768,000 options expired unexercised.
